Chi Impact Capital has been selected as one of the Top Innovation Funds from the Innovative Funds for our Future Challenge on UpLink - World Economic Forum!

Zurich, 21 September 2022 Chi Impact Capital ("Chi"), the conscious and independent impact investing boutique creating deep, positive, measurable impact and strong financial returns advising the Burning Issues Impact Fund (BIIF), yesterday has been selected as one of the Top Innovation Funds from the Innovative Funds for our Future Challenge on UpLink - World Economic Forum!

The Innovative Funds for our Future Challenge was a call for innovative investment funds with a portfolio focus on start-up to scale-up ventures across at least 1 of 8 key Sustainable Development Goals (SDG) areas: Nature, Ocean, Plastics, Climate Action, Circular Economy, Water, Health and Education.

Chi Impact capital was one of the 17 selected funds among 71 Funds from all over the world; the chosen funds will benefit from recognition and visibility, connections with capital providers, privileged access to investment opportunities, and choose in-person and virtual events.

The 'SDG investing market has more than tripled in recent years to over \$715 billion, but this remains a drop in the ocean compared to the \$100+ trillion of total assets under management. Meanwhile, only 50% of the technology needed to achieve Net Zero, and likely other critical sustainable development goals, is currently ready for deployment.

"We are delighted to be selected as one of the top Innovative Funds for our Future; more than never, we need to develop alliances with other impact investors to support our investments, the theory of change of our funds, and the achievement of the SDGs," said Enrique Alvarado Hablutzel from the Chi Impact CapitalTeam who has been present at the award ceremony in New York yesterday.

It's clear that investment-as-usual won't help us achieve the 2030 Global Goals. The funding and innovation needed for this transition will only occur if we can accelerate these entrepreneur ecosystems and mainly support the most innovative SDG-focused funds. *"The key is to strengthen our innovative Impact Investing ecosystem and to strongly accelerate impact investments in order to achieve the UN SDGs,"* said Christin ter Braak-Forstinger from the Chi Impact Capital team.

The BIIF invests in innovative companies using breakthrough technologies that enable its LPs to achieve deep impact and strong financial returns while helping to solve the most burning environmental and social issues of our time.
